

11 - TC Codes Real-Time Sync Module

Overview

The TC Codes module provides real-time synchronization of IRS Transaction Codes from taxpayer account transcripts retrieved via the IRS Tunnel. TC codes describe account actions used for audit defense, refund tracking, and compliance operations.

Critical TC Code Reference

Return and Assessment Codes

TC	Description	Significance
150	Return filed and tax assessed	Return posted to IRS master file
154	Filing requirement change	IRS changed filing requirement

TC Sync Architecture

```
[IRS Tunnel Transcript Request]
-> [TC Parser: Extract TC/date/amount]
-> [TC Classifier: Refund/Audit/Payment/Penalty]
-> [Masterfile Update]
-> [Trigger Evaluation]
-> [Alert Dispatch]
-> [Dashboard Refresh]
```

TC Sync Configuration

```
tc_sync:
  pull_source: "irs_tunnel"
  transcript_type: "TXAC"
  sync_schedule: "0 6 * * 1-5"
  alert_tcs:
    - "570"
    - "810"
    - "420"
```

- "582"
- "971"

dashboard_refresh_seconds: 300
history_retention_years: 7

TC Alert Priority Matrix

TC	Alert Level	Notification	Response Time
570	Warning	In-app + Email	24 hours
810	Critical	In-app + Email + SMS	4 hours
420	Critical	In-app + Email	4 hours
582	Urgent	All channels	Immediate
846	Info	In-app + Email	None
971	Warning	In-app + Email	24 hours
150	Info	In-app	None
