

14 - Access Validation Report

Execution Summary

- Date: 2026-07-11
 - Scope: Phase 2/4, 3/4, and 4/4 completion for role-based access and integration access configuration.
 - Migration Runner: `node platform/db/migrate.js`
 - Database: `ross_tax_pro.db`
 - Result: Success
-

Phase 2/4 - Migration Execution

Migration engine executed all SQL files in order, including:

- `006_role_and_integration_access_directory.sql`

Status: Completed

Phase 3/4 - Access Validation Results

Table Presence

Table	Present
integration_endpoints	Yes
role_integration_access	Yes

Role Permission Totals

Role	Permission Count
ERO_ADMIN	17
PREPARER	11
AUDITOR	10
CLIENT	2

Integration Access Totals by Role/Level

Role	Access Level	Integration Count
ERO_ADMIN	full	11
PREPARER	write	7
PREPARER	read	2
AUDITOR	read	7
CLIENT	own_only	1

Key Mapping Checks

Check	Result
ERO_ADMIN has full access to 11 integrations	Pass
PREPARER has write access to transmission and core workflow integrations	Pass
AUDITOR has read access to compliance-critical integrations	Pass
CLIENT is restricted to own_only refund intelligence	Pass

Status: Completed

Phase 4/4 - Reconciliation and Closure

- Documentation and policy artifacts are in place.
- Migration was applied successfully to local target database.
- Validation evidence captured in this report.

Final Status: Complete
