1. Appendix Control

- Document ID: RTP-IRS-RESP-APPX-001
 - Parent Document: 16 - IRS Form and Letter Response Platform Blueprint
 - Version: 1.0.0
 - Effective Date: 2026-07-12
 - Classification: Internal Restricted - Compliance Controlled
-

2. Purpose and Usage

This appendix provides expanded, operations-ready mapping tables for IRS notice families, letter families, and form families. These tables are intended for direct use by:

1. Intake classification pipelines.
2. ERO and reviewer playbooks.
3. Rule engine routing and SLA enforcement.
4. Audit and compliance traceability checks.

All entries are placeholders for legal and procedural references and must be finalized by governance review before production policy lock. [Citation: IRM 1.x.x.x] [Citation: IRM 21.x.x.x]

3. CP Notice Family Mapping

6. Crosswalk: Notice to Workflow and AI Gate Requirements

Table A4: Workflow and human-in-the-loop crosswalk

Identifier Family	Default Workflow Path	Mandatory Human Gate	AI Constraint Level	Submission Authority
CP2000 / discrepancy notices	Intake -> Triage -> Analysis -> Draft -> Review -> Submit	Gate A + Gate D	High	ERO or authorized signer
Deficiency letters (LTR3219C-type)	Intake -> Triage -> Counsel Review -> Draft -> Senior Review -> Submit	Gate A + Gate C + Gate D	Critical	Authorized signer with counsel concurrence
Collections escalation notices (CP504/CP90)	Intake -> Triage -> Compliance Review -> Resolution Draft -> Submit	Gate B + Gate D	Critical	Compliance-approved signer
Information request letters (LTR12C family)	Intake -> Evidence Collection -> Draft -> Review -> Submit	Gate D	Medium	Reviewer-approved preparer flow
Standard return processing notices	Intake -> Triage -> Draft -> Review -> Submit	Gate D	Medium	ERO delegated authority

7. Data Dictionary for Mapping Tables

Field	Definition	Validation Rule
Deadline Class	Policy bucket for urgency and legal time windows	Must map to policy catalog value
Risk Tier	Operational risk assignment	Enum: low, medium, high, critical
Escalation Path	Ordered role route for exceptions	Must terminate at accountable approver
Rule Modules	Engine modules required for case family	Must reference compiled policy bundle IDs
Authority Placeholders	Legal/procedural citations	At least one IRM or IRC citation required

8. Implementation Notes

1. Bind Table A1-A4 rows to canonical registry IDs used in Section 16.
2. Attach each row to at least one template bundle and one checklist bundle.
3. Add automated coverage tests to ensure every high-risk family has mandatory human gates.
4. Use policy migration workflow to version-control mapping changes.
